## Modul

## Sachverhalt

you can apply for recertification for aviation security screeners from your competent aviation security authority.

- Aviation security screeners must be recertified within a certain period of time. This is a formal assessment and confirmation by the competent aviation security authority that the person concerned still has the necessary qualifications to carry out the tasks assigned to them in an appropriate manner. This ensures that the required content is refreshed and that new content can be adequately taught.
- Airport operators and security service providers continuously train aviation security screeners after their training.
- The training is based on the following topics: Legal bases of aviation security Weapons and explosives law Consolidation of control procedures Evaluation of X-ray images and Carrying out checks, including procedures and responsibilities in a checkpoint, especially when detecting prohibited items.
- The training also takes into account local and deployment-specific conditions. Special emphasis is placed on teaching current procedures in the workplace, detecting prohibited items and learning about new threats to aviation security.
- If the re-certification is successfully completed, the aviation security screener in question will receive their re-certification certificate based on the personal data provided. Only with this certificate can you deploy your aviation security screener in the aviation security sector.

## Erforderliche Unterlagen

### Voraussetzungen

- You have a valid background check.
- You have the physical and mental aptitude to work as an aviation security screener.
- You have completed further training in the last three years.

### Kosten

Cost type: variable Remark: Fees according to central regulation - Aviation Security Fee Regulation (LuftSiGebV)

### Verfahrensablauf

- As an airport operator or security service provider, you can apply for the recertification of aviation security

**Modul**
**Sachverhalt**

screeners in writing or online to the aviation security authority responsible for you.

- If you wish to apply for recertification in writing: First, as an airport operator or security service provider, you notify the competent aviation security authority of the need for recertification of your aviation security screeners and at the same time submit training certificates, results of the image evaluation and the assessment of the work performance of the persons to be recertified over the last three years. The aviation security authority accepts the documents and checks them. You can submit any missing documents at a later date. The responsible aviation security authority will set a date for the image evaluation test in consultation with the security service provider. The aviation security authority then carries out the image evaluation test on the persons to be recertified. Once recertification has been successfully completed, the recertification certificate is issued. The security service provider receives information about the results of the recertification. The airport operator receives a copy of the recertification certificates. A fee notice is issued and sent to the aerodrome operator.
- If you wish to apply for recertification online: You call up the online service. Select the application type "Recertification of aviation security screeners". The remaining procedural steps correspond to the written procedure.

**Bearbeitungsdauer**

Processing usually takes 3 - 5 days.

**Frist**

Type of term: Period of validity Duration: 3 years  
 Remark: A recertification interval of three years is provided for persons operating X-ray or EDS equipment.
