Sachverhalt

Business operators do not have to be registered if they

- supply small quantities of plants directly to the end user (with the exception of distance selling)
- supply seeds in small quantities directly to the end user
- transport plants for another entrepreneur
- Transporting items in wooden packaging

Entrepreneurs (commercial activity) can only be entered once in the register of a competent authority. If an operator has several businesses or branches, reference is made to the branches in the official register.

Information on protected areas: In the EU, there are phytosanitary protected zones in which one or more specific pests do not yet occur. Certain goods may only be delivered to these protected areas if they meet special requirements. Ireland, for example, is still free of some pests due to its island location and therefore there are additional requirements for certain goods. In Germany, there are currently no phytosanitary protected zones.

Erforderliche Unterlagen

- Site plan: This is required for all companies that have other buildings / areas in addition to their office that are important for phytosanitary activities (e.g. nursery quarters, greenhouses).
- Information on other business premises: Information is required for all companies that have other operating sites (with their own address) in addition to their head office. Pure production areas (e.g. nursery quarters) are not counted as business premises, but must be indicated on the site plan.
- Information on regulated product types, families, genera and species of plants, plant products and other objects that are to be imported with a phytosanitary certificate.
