Leistungstyp	Leistungsobjekt mit Verrichtung
Leistungsgruppierung	

Modul	Sachverhalt
Verrichtungskennung	Gewährung (80)
SDG-Informationsbereich	nicht SDG-relevant
Lagen Portalverbund	Förderung von Energie und Klimaschutz (2060700)
Einheitlicher Ansprechpartner	Nein
Fachlich freigegeben am	17.08.2018
Fachlich freigegeben durch	Federal Ministry for Economic Affairs and Energy
Handlungsgrundlage	Directive on the promotion of renewable energy systems in the heating market (entered into force on 1.1.20)
Teaser	
Volltext	The "KfW Renewable Energies - Premium - Deep Geothermal" programme supports investments in deep geothermal plants as well as the associated drilling with low-interest loans from KfW in conjunction with repayment subsidies from the federal government under the Markanreizprogramm (MAP). With the Renewable Energies - Premium - Deep Geothermal Energy benefit, your energy project will be funded if you want to tap and use deep geothermal energy at a drilling depth of more than 400 metres, the thermal fluid is at least 20° C warm, your project is carried out in Germany and all other funding requirements are met. There are three independent, cumulative funding modules: - Repayment subsidy for the above-ground plant ("plant subsidy"), - repayment subsidy for drilling costs, - additional cost subsidy. Combination with other public subsidies is possible if the EU subsidy limits are complied with. A maximum of 80 percent of the eligible costs may be financed from public funds. Excluded from funding are: • Firms in difficulty (in certain cases), • manufacturers of eligible equipment, and • the federal government, the federal states and their

Modul	Sachverhalt
	institutions There is no legal entitlement to the subsidised loan and the repayment grant.

Voraussetzungen	In particular, you are a company or a municipality.
Kosten	No fees are charged for the application.
Verfahrensablauf	KfW does not grant the loans directly (with the exception of municipalities), but through your chosen financing partner. • Apply for the loan with your financing partner. • Your financing partner then applies for the funding on your behalf • KfW now checks your documents and decides on the funding. • You conclude the loan agreement and your project can begin. • Once the work has been completed, you submit a confirmation so that the repayment subsidy can be credited to you.
Bearbeitungsdauer	The processing time cannot be determined in advance. It depends on the necessary approvals, e.g. according to the Federal Mining Act (BBergG), the regulations of the Federal Water Act (WHG) or the water laws of the federal states and building planning or building regulations.
Frist	The application must be submitted before the start of the project. The start of the project is deemed to be the conclusion of a supply or service contract attributable to the execution. Planning services may be

Modul	Sachverhalt
	provided before the application is submitted; necessary reservations of equipment, capital goods or services are permitted. The regulations of KfW also apply.
