Teaser	If you develop and use geothermal energy from the depths for energy and heat generation, you can apply for a loan with a repayment subsidy under certain conditions.
Volltext	<p>The Federal Ministry for Economic Affairs and Energy (BMWi) promotes measures to increase energy efficiency.</p> <ul style="list-style-type: none"> • for the construction of plants to use geothermal energy, • for production and injection wells to tap geothermal energy at a drilling depth of more than 400 metres for heat generation or for combined electricity and heat generation, • for additional costs for boreholes with special technical risks. <p>You will not receive any subsidies</p> <ul style="list-style-type: none"> • for exploratory drilling, • for self-built and second-hand plants, • for prototypes (plants of which there are less than 4 units), • if you are the manufacturer of eligible equipment or its main components,

Modul

Sachverhalt

- for trust constructions,
- for so-called in-lieu transactions, such as purchases from a spouse's property,
- for debt rescheduling and follow-up financing of measures that have already been started,
- if you have already started with the measure before you submitted the application.

If you tap deep geothermal energy and use it sustainably, you can get a loan of up to EUR 25 million. You can get a loan for up to 80 percent of the eligible costs of your measure.

- You receive EUR 200 per kilowatt (kW) of installed or expanded nominal heat output. You can receive a maximum of EUR 2 million in subsidies.
- Plant subsidies:
 - for drilling depths from 400 metres to 1,000 metres below, you receive EUR 375 subsidy for each metre of vertical depth (not drilling distance),
 - for the drilling depth between 1,000 meters and 2,500 meters below, you will receive EUR 500 subsidy for each meter of vertical depth (not drilling distance),
 - From a drilling depth of 2,500 metres, you receive EUR 750 subsidy for each metre of vertical depth (not drilling distance),
- Drilling cost subsidy:
 - For deep wells with a particular technical risk, you will receive up to 50 percent of the resulting additional costs for each well (but no more than 50 percent of the previously planned costs).
- Additional expenses for deep wells with particular technical risk:
 - The amount of your grant depends on the gross electrical output (P) and the nominal heat output (Q). The grant is calculated as follows: $(1-(P/Q)) \cdot \text{EUR } 200$ per kilowatt of installed or expanded nominal heat output. You can receive a maximum grant of EUR 1 million.
- Plant production:
 - for the drilling depth from 400 meters to 1,000 meters you will receive EUR 375 subsidy for each meter of vertical depth (not drilling distance),
 - for the drilling depth between 1,000 meters and 2,500 meters below, you will receive EUR 500 subsidy for each meter of vertical depth (not drilling distance),
 - From a drilling depth of 2,500 meters, you no longer

Sachverhalt

receive a subsidy.

- Drilling cost subsidy:

- For deep wells with special technical risks, you will receive up to 50 percent of the resulting additional costs for each well (but no more than 50 percent of the previously planned costs).

- Additional expenses for deep wells with particular technical risk:

If you

- with fewer than 250 employees
- have an annual turnover of less than EUR 50 million and

- one company

- the heat and/or energy produced by your measure is used for the operation of a small or medium-sized enterprise (SME),

then your grant will increase by 10 percent overall.

- less than 250 employees

- an annual turnover not exceeding EUR 50 million.

You will only receive the repayment grant once you have completed your measure. To do this, you must prove

- that you have spent the money from the loan on the measure,

- that the measure technically fulfils its purpose.

You must keep all invoices and receipts related to eligible costs.

Erforderliche Unterlagen

When submitting your application, you must submit:

- Application for redemption subsidy for deep geothermal energy.

- "De minimis" declaration

- in the case of de minimis support:

- Simplified self-declaration SME (if your company is independent and not interlinked with other companies)

- Self-declaration SME (if your company is not independent and is interlinked with other companies)

- Checklist for extra investment costs (if you are applying for environmental and energy aid)

- in the case of support under the General Block Exemption Regulation (GBER):

If applicable, you must submit further documents for technical documentation.

- Where-used list for companies and freelancers

Modul	Sachverhalt
	<ul style="list-style-type: none"> • Technical annex to the where-used list https://www.kfw.de/inlandsfoerderung/Unternehmen/Energie-Umwelt/F%C3%B6rderprodukte/Erneuerbare-Energien-Tiefengeothermie-(272-282)/
Voraussetzungen	<p>Applications may be submitted by</p> <ul style="list-style-type: none"> • small enterprises with • with less than 50 employees • a turnover not exceeding EUR 10 million per year <p>Other requirements:</p> <ul style="list-style-type: none"> • Your measure must meet technical standards: • Your facility must tap and use geothermal energy from a drilling depth of more than 400 meters, • the extracted thermal water or steam must be at least 20 degrees Celsius and have a geothermal heat output of at least 0.3 megawatts • in the case of plants for combined electricity and heat generation: the nominal heat output must be at least 4,000 kilowatts • the gross electrical capacity must be less than the heat connection capacity on the offtake side • the heat and/or electricity from your system must be used predominantly in Germany • You must operate your system for at least 7 years <p>Notice:</p>
Kosten	<ul style="list-style-type: none"> • Not applicable
Verfahrensablauf	<p>You must submit the application for funding in writing to the Kreditanstalt für Wiederaufbau (KfW).</p> <ul style="list-style-type: none"> • You first need a financing partner, through whom you then submit your application to KfW. A financing partner can be a bank, building society or financial intermediary. • Talk to your financing partner (for example, the bank with which you would like to conclude your financing) about including a promotional loan. They will advise you on which documents are required and will submit the application to KfW on your behalf. • Once KfW has approved your application for funding, you conclude a loan agreement with your financing partner. • As soon as the approval for your subsidy has been received, you can begin with the construction work or conclude the purchase contract.

Modul
Sachverhalt

- Depending on the progress of construction, your financing partner will pay you the loan in one sum or in instalments.
 - that you have spent the money from the loan on the planned measure and
 - that your measure meets the standard for KfW-efficient buildings.
- When you have completed the measure, you must provide proof to your financing partner,
- Your financing partner checks and confirms your evidence and forwards it to KfW.
- If KfW has also checked the evidence, you will receive the repayment subsidy as a credit to your loan account. This reduces the term of your loan.

Bearbeitungsdauer

- for processing the application: usually 3 to 5 days.
- Notice:

Frist

- Application: before the start of the measure
- Call deadline for the loan: within 12 months of the loan commitment, in one sum or in instalments.
- Evidence of use of funds: within 9 months after full disbursement of the loan.

Kurztext

- KfW Renewable Energy Development Loan - Deep Geothermal (Premium) - No. 272/282 Small Business Approval (282).
- repay less: Loan with repayment subsidy for the use of deep geothermal energy for energy and heat generation
 - the construction of facilities to use geothermal

Modul
Sachverhalt

energy

- production and injection wells to tap geothermal energy for heat generation or for combined electricity and heat generation
- the additional costs of drilling with special technical risks
- are subsidized:
 - small enterprises (with fewer than 50 employees and annual sales of no more than EUR 10 million)
- Applications for funding can be made:
 - up to 50 percent repayment subsidy
- Amount of funding:
 - there is no legal entitlement to funding
- Information by: Service number of the Reconstruction Loan Corporation (KfW)
 - Application must be made through a financing partner (e.g. bank, building society or financial intermediary)
- Apply via:
- responsible: Reconstruction Loan Corporation (KfW)
