Teaser	If you manufacture or sell terminals for BOS digital radio, you must have them certified.
Volltext	In digital radio for public safety authorities and organizations (BOS), terminals from various manufacturers are used. To ensure that these terminals are compatible with all network components and with each other, you may only use terminals certified by the Federal Agency for the Digital Radio of Authorities and Organizations with Security Tasks (BDBOS). The BDBOS has defined performance characteristics in the interoperability guidelines (IOP guidelines) that all terminals must fulfill. Compliance with these defined performance features is confirmed by a corresponding certificate. If you manufacture or sell terminal devices that are intended by BOS for communication in BOS digital radio, you must have these terminal devices certified. To do this, you must submit an application to the BDBOS. Certification requires a technical test by a competent test center. They will prepare a BOS test report, which you submit together with your application for certification. The BDBOS also requires two individual pieces of your terminal device. The certification confirms that your terminal device meets all the specified performance characteristics and is suitable for trouble-free operation. It always relates to a specific hardware and software version of a terminal device.

Modul	Sachverhalt
Erforderliche Unterlagen	• Application form for certification • BOS test report • Attachment "Requested LM-END" for the type of your terminal device
Voraussetzungen	• You must have access to the protected area of the BDBOS web portal. • If your company is based outside the European Union (EU) or the European Economic Area (EEA): • You must provide an authorized recipient with an address within the EU or EEA.
Kosten	Gebühr: 334€ - 3.817,36€ Bank transfer/payment slip SEPA bank transfer
Verfahrensablauf	You can apply for the certification of terminal equipment online or by post. • You provide the BDBOS with two individual pieces of the terminal device to be certified • including customer documentation • and the equipment and usage rights required for operation. • This step is not necessary if your terminal device is part of a radio control center. Apply for certification of terminal equipment online: • Call up the online application on the federal portal verwaltung.bund.de. This will guide you step by step through the necessary information, which you can enter electronically. • Note: You will need an ELSTER organization account for the online application. • Upload the required documents and submit the application. • The BDBOS will check your details and documents and contact you if any documents are missing or incomplete. • The BDBOS will carry out a supplementary check if necessary. • The BDBOS will send you • the certificate

Modul
Sachverhalt

- or a notice of rejection.
- The BDBOS will send you the notification of fees.
- You pay the fees.

Apply for certification of terminal equipment by post:

- Download the "Certification of terminal equipment" form from the BDBOS website.
- Complete and sign the form and send it to the BDBOS together with the required documents.
- The BDBOS will check your details and documents and will contact you if any documents are missing or incomplete.
- If necessary, the BDBOS will carry out a supplementary check.
- The BDBOS will send you
 - the certificate
 - or a notice of rejection.
- The BDBOS will send you the notification of fees.
- You pay the fees.

Bearbeitungsdauer

2 - 6 Woche(n)
 Applications are processed in the order in which they are received.

Frist

4 Woche(n)
 You do not have to observe any further deadlines.

Hinweise

An expert inspection body must be commissioned to inspect the terminal devices. The test center's expertise must be proven.

Rechtsbehelf

- Objection
 - After unsuccessful objection: action before the administrative court

Kurztext

- Certification of terminal devices Issue
 - Terminals for digital radio for public safety authorities and organizations (BOS) require certification
 - Manufacturers or suppliers apply for certification

Modul

Sachverhalt

from the Federal Agency for the Digital Radio of Authorities and Organizations with Security Tasks (BDBOS)

- Applications must be submitted electronically or in writing using the BDBOS application form
- Applicants must submit two terminals to BDBOS
- Proof required:
 - BOS test report from a test center
 - Proof of expertise from the test center
 - Optional: Documents from the "TETRA + Critical Communications Association"
- Certification procedure is subject to a fee
- responsible: Federal Agency for the Digital Radio of Authorities and Organizations with Security Tasks (BDBOS)
