## Modul

## Sachverhalt

of people. The amount of the pension is based on the so-called average annual earnings (dJAV), taking into account possible age reductions for

- agricultural entrepreneurs and their wives and husbands
- their wives and husbands or life partners

For severely injured persons (MdE of 50 percent and more), the JAV is increased for pensions for an indefinite period:

- by 25 percent for a MdE of 50 to 74 percent
- by 50 percent for a MdE of 75 to 100 percent
- does not apply to provisional pensions

For assisting family members without an employment contract, the JAV is also based on the so-called reference figure. The reference figure is based on the average income in Germany and changes annually.

A lower JAV is set for minors.

The JAV is reduced for family members working permanently in the company without an employment contract. The extent to which the JAV is reduced depends on how old the person is at the time of the insured event.

## Erforderliche Unterlagen
