Teaser	If you wish to store explosive substances, e.g. explosives, fireworks or other pyrotechnic articles, you require a storage permit in accordance with Section 17 of the Explosives Act.
Volltext	In principle, a permit in accordance with the Explosives Act (SprengG) is required for the storage of explosive substances. Only small quantities are exempt from this. The following are subject to approval • the construction and operation of warehouses in which explosive substances are to be stored, as well as • significant changes to the nature or operation of such storage facilities. The permit also includes other official decisions relating to storage, in particular building regulations. The content of the permit can be restricted and linked to conditions, insofar as this is necessary, in particular to ensure precautions against risks to life, health and property. Subsequent amendments and additions to conditions are permitted.
