Volltext	Since 4 July 2009, if you install plants with fluorinated greenhouse gases, check for leaks, maintain, maintain or recover the gases, you need a new certificate of competence so that you can continue your activity. This is provided for by the Chemicals Climate Protection Regulation, which came into force on 1 August 2008 and is based on the European F-Gas Regulation . The following activities are affected: • activities on refrigeration systems, air conditioning systems and heat pumps, • activities at equipment containing fluorinated greenhouse gases as solvents, • activities on fire protection systems and fire extinguishers, • activities on high-voltage switchgear and • Activities on air-conditioning systems in motor vehicles. In order to acquire the certificates of competence, you must always pass a theoretical and practical competence test. For activities on air-conditioning systems in motor vehicles, participation in a course is sufficient.
