| Teaser | If you want to work in Germany as a medical-technical assistant for functional diagnostics, you need a state permit. |
| Volltext | Working as a medical-technical assistant for functional diagnostics is regulated in Germany. This means that in order to work as a medical-technical assistant for functional diagnostics in Germany, you need a state |

Modul

Sachverhalt

license. With this permit, you can use the job title "medical-technical assistant for functional diagnostics" or "medical-technical assistant for functional diagnostics" and work in the profession.

If you have a professional qualification from a so-called third country, you can also obtain a state license from the competent authority in Germany. Third countries are all countries that do not belong to the European Union (EU), the European Economic Area (EEA) or Switzerland.

In order to obtain the permit, you must have your foreign professional qualification recognized.

In the recognition procedure, the competent authority compares your professional qualification from abroad with the German professional qualification and checks the equivalence. The equivalence of the professional qualification is an important prerequisite for the granting of a state license.

In addition to the equivalence of the professional qualification, you must also meet other requirements for the permit to be issued. Further requirements are, for example, sufficient German language skills and health suitability.

If your professional qualification originates from the EU, the EEA or Switzerland, other regulations apply.

You can also apply for the procedure from abroad.

Erforderliche Unterlagen

The responsible office will tell you which documents you need to submit. Important documents are generally

- Proof of identity (identity card or passport)
- German-language CV in tabular form with your education and professional activities
- Officially certified copy of your training certificate
- Proof of your relevant professional experience as a medical-technical assistant for functional diagnostics or medical-technical assistant for functional diagnostics

Modul

Sachverhalt

- Proof of other relevant knowledge for working as a medical-technical assistant for functional diagnostics or medical-technical assistant for functional diagnostics
- Criminal record extract or certificate of good conduct from your country of origin as proof of your reliability (this proof must not be more than 3 months old at the time of application)
- Medical certificate of good health (this can be from an authority in your country of training. This certificate must not be older than 3 months at the time of application).
- Registration certificate or declaration that you wish to work where you are submitting the application

The competent authority will tell you which documents you need to submit in the original or as a copy.

If your documents are not in German, you must submit German translations of your documents. The translations must be made by translators who are publicly appointed or authorized.

Voraussetzungen

Ask the Darmstadt Regional Council about the specific requirements. In general, the following requirements apply:

- You have a professional qualification as a medical-technical assistant for functional diagnostics or medical-technical assistant for functional diagnostics from a third country.
- You are in good health. (This means that you are mentally and physically able to work as a medical-technical assistant for functional diagnostics).
- You are reliable for working as a medical-technical assistant for functional diagnostics and have no criminal record.
- You have the German language skills required for the job. This is normally language level B2 according to the Common European Framework of Reference for Languages.

Kosten

The procedure costs money. The responsible office will

Modul

Sachverhalt

inform you of the costs. The costs generally depend on the time and effort required for processing.

Additional costs may also be incurred (e.g. for translations, certifications or compensatory measures). These costs vary from case to case.

Verfahrensablauf

Examination of equivalence

You submit an application to the competent body for permission to use the job title "Medical-technical assistant for functional diagnostics" or "Medical-technical assistant for functional diagnostics". The competent authority will then check whether you meet all the requirements. An important requirement is the professional qualification. The competent authority will compare your professional qualification from abroad with the German professional qualification as a medical-technical assistant for functional diagnostics. The competent body will check whether your professional qualification is equivalent. The professional qualification is equivalent if there are no significant differences between your foreign professional qualification and the German professional qualification.

Possible results of the examination

If your professional qualification is equivalent, your foreign professional qualification will be recognized. The authority can confirm the result in writing. You must still meet the other requirements and provide proof of your language skills. You will then receive permission to use the professional title of "medical-technical assistant for functional diagnostics" or "medical-technical assistant for functional diagnostics".

If the competent authority identifies significant differences, you can compensate for the differences through your professional experience and other knowledge and skills (lifelong learning). You must provide evidence of your professional experience. Knowledge and skills must be certified by an authority in your country of origin.

Modul

Sachverhalt

However, this knowledge may not be sufficient. You will then not be able to compensate for the major differences. Your foreign professional qualification will then not be recognized.

However, the competent authority will tell you the main differences and why you cannot compensate for the main differences with your professional experience. You will then not be allowed to work as a medical-technical assistant for functional diagnostics. However, the competent authority will offer you the opportunity to complete an adaptation period or take a knowledge test as a compensatory measure. If you successfully complete this measure, you will be allowed to work in the profession.

****Adaptation course or knowledge test****

If your professional qualification is not equivalent, you can choose between a knowledge test and an adaptation period of up to three years. The knowledge examination tests your knowledge in certain subjects and areas. These subjects and the exact course of the examination are regulated by law. The knowledge test is a practical examination with an interview. If you complete the adaptation period or pass the knowledge test (and meet all other requirements), you will receive permission to use the professional title of "medical-technical assistant for functional diagnostics".

Bearbeitungsdauer

The responsible office will confirm that your documents have arrived after a maximum of one month. The competent office will inform you if any documents are missing. If the documents are complete, the procedure will take a maximum of 4 months.

Frist

None. Sometimes documents are still missing from the procedure. The responsible office will then inform you by when you must submit the documents.
