Teaser	Does your company want to install, maintain, maintain, repair or decommission plants with fluorinated greenhouse gases, as well as check for leaks or recover the gases? Then you need a certificate.
Volltext	If you install, maintain, maintain, repair or decommission plants with fluorinated greenhouse gases, as well as check for leaks or recover the gases, you would need a certificate for your company. This will be issued to you by the competent authority.
Erforderliche Unterlagen	• Completed Application for Operational Certification • Copies of the certificates of competence for staff covering the activities in question.
Voraussetzungen	The activities of installation, maintenance or servicing

Modul

Sachverhalt

of installations must have a sufficient number of competent personnel. It must also have access to the tools and procedures necessary for the activities subject to certification.

For activities related to fire protection systems and fire extinguishers, sufficient personnel with a corresponding certificate of competence must be available for the annual expected volume of activities and the necessary technical equipment must be sufficiently available in terms of type and number.

Registered EMAS establishments may obtain the certificate if the environmental statement or audit report shows that the above conditions are met and the following information is apparent:

- Name and registered office of the company
 - Identification of the site and the certified activities related to the site and its facilities
 - Name of the authority (competent authority), date and signature
- <https://www.emas-register.de/der-weg-zur-emas-registrierung>
