Teaser	Would you like to view environmental information, such as data on the condition of the air, water, soil or landscape in mining areas in your region? You can view and request this information from the relevant authorities.
Volltext	In Germany, the government and public administration bodies actively inform the general public about the environment. Every person is entitled to free access to environmental information via these bodies that are obliged to provide information. Environmental information provides information about • the state of the environment, human health and safety, • factors, activities and measures that have an impact on the environment, • environmental law, • political programs relating to the environment. You can also request specific data from the authorities yourself, for example on air and water quality and data on biotopes and protected areas. If you wish to receive certain environmental information, you can apply to the competent authority. You do not have to prove a legal interest. In the mining sector, for example, the following

Modul	Sachverhalt
	information is of interest: • Flow paths and nature of ground and surface water, • effects on soil, fauna and flora and • Holders and terms of mining licenses in a particular area. You can gain access to environmental information, for example, by requesting information or inspecting files.
Erforderliche Unterlagen	Your application must specify the exact information you require, i.e. the body must be able to identify what information you need from it.
Voraussetzungen	Every person has the right to view and request environmental information about bodies that are obliged to provide information.
Kosten	The fees are determined according to the effort required to obtain the information. If the authority rejects the application, no costs are incurred.
Verfahrensablauf	
Bearbeitungsdauer	1 - 2 Monat(e) The requested information must be made available to you immediately. As a rule, this means: no later than 1 month after you have requested the information. In the mining industry, some procedures are very complex and involve various authorities, agencies and companies, so this deadline is often extended. In this case, you will receive information on the status.
Frist	1 Monat(e) You can lodge an appeal with the authorities against an application that has been rejected (in whole or in part). If this does not lead to a different result, you can take legal action.
weiterführende Informationen	
Hinweise	The bodies required to provide information do not include certain federal authorities that are involved in
