Teaser	As a rule, you require a building permit for the construction, modification and change of use of (structural) facilities.
Volltext	<p>As a rule, you require a building permit for the construction, erection, installation, modification, change of use, demolition and removal of (structural) installations or parts thereof.</p> <p>For special buildings (e.g. high-rise buildings), planning permission is granted in the conventional planning permission procedure.</p>

Modul

Sachverhalt

For other construction projects requiring approval, planning permission is granted in the simplified planning permission procedure.

You can apply for a building permit by submitting a building application together with the necessary documents digitally in the building portal or in analog form.

You may only start building once you have received the building permit.

The construction site sign must be visible from the public road.

The building permit expires if you do not start construction work within 3 years of the permit being issued or if construction work has been interrupted for one year after this period. The period can be extended by up to 2 years in each case with a written application.

Erforderliche Unterlagen

Information on the required documents and forms can be found under the attached link to building documents.

<https://wirtschaft.hessen.de/wohnen-bauen/bauvorschriften/dokumente-und-vordrucke>

<https://wirtschaft.hessen.de/wohnen-bauen/bauvorschriften/dokumente-und-vordrucke>

Voraussetzungen

All required documents and forms have been submitted in full digitally in the construction portal or in analog form. The project does not conflict with any public law regulations.

Kosten

With the exception of demolition, the amount of the fees is based on the structural costs of the building. The respective local authorities can set fees that deviate from the list of fees in the administrative cost regulations by means of statutes. Please contact the building supervisory authority responsible for you.

Verfahrensablauf

As the building owner, you must submit the building application with the required building documents to the building supervisory authority in whose area the property is located. The building supervisory authority

Modul

Sachverhalt

will check whether the building documents are complete. If the building application cannot be processed due to missing documents, it may be rejected. Individual building documents can be requested subsequently. If the building documents are complete, the building supervisory authority (with the involvement of the municipality and specialist departments) will check whether the building project is contrary to public law regulations. Once all comments have been received and the building application has been reviewed, the building supervisory authority will inform you of its decision digitally via the building portal or in analog form: - the building permit is granted, - only granted with certain requirements and conditions or - the building application is rejected.

You may only start work on the project once you have received the building permit.

Bearbeitungsdauer

The duration of the procedure depends on the individual case, in particular on which offices need to be involved and whether all the necessary documents are complete.

Frist

A building permit issued is valid for 3 years. If building work is not carried out until a later date, an extension of the building permit must be applied for in writing before the deadline expires. This also applies if construction work has been interrupted for more than one year.

weiterführende Informationen

Hinweise

Firing systems may only be put into operation after the expert for energy generation systems (e.g. the authorized chimney sweep) has certified that they are safe to use and that the exhaust gases are properly discharged.

Rechtsbehelf

An appeal may be lodged against the authority's decision within one month of notification.

Kurztext

- Construction of facilities Permit
- For the erection, installation, attachment and modification as well as change of use, demolition and

Modul

Sachverhalt

- removal of (structural) installations or parts thereof
- For special buildings (e.g. high-rise buildings), planning permission is granted in the conventional planning permission procedure.
 - Application: Submit the building application together with the associated required documents digitally in the building portal or in analog form.
 - Start of construction only after the building permit has been issued
 - A construction site sign must be visible from public traffic areas.
 - The building permit expires if construction work has not begun within 3 years of the permit being issued or if construction work has been interrupted for one year after this period.
 - The period can be extended by up to 2 years in each case with a written application.
 - Responsible: Lower building supervisory authority.

Ansprechpunkt

To the lower building supervisory authority (building supervisory authorities of the districts, independent cities, special status cities).
