Teaser	If you wish to operate a technical X-ray device or make significant changes to it, you must first apply for a permit from the competent authority.
Volltext	You require a corresponding permit to operate or significantly change the operation of technical X-ray equipment that requires a permit. Before you receive the permit, the authorities will check the legal requirements and the documents submitted.
Erforderliche Unterlagen	In addition to the main application for approval, the following documents must be submitted:  1\ plans, drawings and descriptions that are required to check the licensing requirements,  2\ information that makes it possible to check whether  a) the number of radiation protection officers necessary for the safe performance of the activity has been appointed and whether they have been granted the powers necessary for the performance of their duties, b) it is ensured that the equipment is available and measures have been taken that are necessary according to the state of the art to ensure compliance with the protection regulations,

## Modul

## Sachverhalt

3\.. information that makes it possible to check whether the person responsible for radiation protection and the radiation protection officers are reliable and have the necessary expertise in radiation protection,

4\.. a copy of a radiation protection instruction if it is necessary to issue a radiation protection instruction,

I.e. in particular:

- Proof of expertise in radiation protection including proof of updating
- Certificate and test report on radiation protection testing of the device by an expert or an expert organization
- Type approval certificate with confirmation of routine testing or CE certificate of conformity
- Proof of knowledge of radiation protection for the personnel deployed, including updates to these certificates

## Voraussetzungen

Approval will be granted if the relevant requirements are met. The requirements are met if

1. there are no facts that give rise to concerns about the reliability of the applicant, his or her legal representative or, in the case of legal entities or associations of persons without legal capacity, the persons authorized to represent or manage them by law, articles of association or partnership agreement and, if a radiation protection officer is not required, one of the aforementioned natural persons has the necessary expertise in radiation protection,
2. there are no facts that give rise to concerns about the reliability of the radiation protection officers and they have the necessary expertise in radiation protection,
3. the number of radiation protection officers necessary for the safe performance of the activity has been appointed and they have been granted the necessary powers to perform their duties,
4. it is ensured that the persons otherwise involved in the activity have the necessary knowledge and skills with regard to the possible radiation hazard and the
