## Modul

## Sachverhalt

equipment required for your job, you must first determine whether asbestos is present in solid or weakly bound form as part of your risk assessment. Information on whether asbestos is present or expected, depending on the usage or construction history of the property, must be obtained from the building owner or client.

- Based on the results of your preliminary investigation, the necessary occupational safety measures and the work procedure to be used must be determined.
- You then draw up a work plan. In this plan, you set out which work procedures and work equipment will be used to remove and dispose of asbestos and materials containing asbestos.
- Based on the risk assessment and the work plan, you must instruct your employees in relation to the work to be carried out.
- If the above requirements are met, you must notify the relevant district government as the responsible occupational health and safety authority of the work at least seven days before starting the activity.
- In exceptional cases, the deadline may be shortened upon written application.
- The notifications can be company-related or object-related. Company-related notifications must be sent to the health and safety authority responsible for the company headquarters, property-related notifications must be sent to the health and safety authority responsible for the location of the property.
- A copy of the company-related notification must be kept at the place of use for inspection.
- In addition to the notification, you must also submit the risk assessment and work plan you have drawn up. The notification must be accompanied by proof that the company's personnel and safety equipment are suitable for the notified work.
- If the notification is complete and plausible, you will not receive any feedback from the health and safety authority. After the seven days have elapsed, you can start the notified work.
- Missing notifications, incorrect, incomplete or untimely notifications constitute administrative offenses that can be punished with a fine.

Modul	Sachverhalt
Bearbeitungsdauer	In principle, there is no confirmation by the authority.
Frist	<ul style="list-style-type: none"> <li>• Activities involving materials containing asbestos must be notified to the property or company at least 7 days before the start of the work.</li> <li>• In addition to the company-related notification, no deadline must be observed for the notification of place and time.
