Teaser	
Volltext	The operation of energy supply grids is subject to approval. Approval is granted if the applicant has the necessary personnel, technical and economic capacity to operate an energy supply grid in order to guarantee grid operation in accordance with the provisions of this Act in the long term.
Erforderliche Unterlagen	Excerpt from the applicant's commercial register Description of the applicant's organizational structure and overview of the personnel to be employed with training descriptions, including for service providers if applicable Lease agreement or other usage agreement, service or management contract if applicable (depending on the contractual structure) Maintenance contract with third-party company if applicable Management contract (depending on the contractual structure of the network operation) Maintenance contract with third-party companies, if applicable Cartographic representation of the network Overview/description of the technical systems Proof of compliance with the recognized rules of technology of the German Electrical and Electronic Manufacturers' Association, e.g. by submitting a confirmation of technical safety management (TSM confirmation) in accordance with

Modul	Sachverhalt
	VDE-AR-N 4001 (S 1000) for the operation of electricity supply networks or the DVGW Deutscher Verein des Gas- und Wasserfaches e.V. (German Technical and Scientific Association for Gas and Water). - Technical scientific association, for example by submitting a confirmation of technical safety management (TSM confirmation) in accordance with DVGW worksheet G 1000 for the operation of gas supply networks Presentation of risk management for network operation (fault monitoring, fault rectification) Submission of a current annual financial statement (for newly established companies: opening balance sheet, business plan and medium-term financial planning)
Voraussetzungen	The applicant must use the aforementioned documents to demonstrate and, if necessary, prove that it is capable of operating an energy supply network on a permanent basis.
Kosten	The decision is subject to a fee of between €500 and €100,000.
Verfahrensablauf	The applicant must submit an informal application for a permit to operate an energy supply network to the energy supervisory authority. The above-mentioned documents must be attached; if they are incomplete, they can also be submitted subsequently. The energy supervisory authority first checks the application and the documents submitted for completeness and conclusiveness. It then contacts the applicant and discusses the next steps and procedure with them.
