Modul	Sachverhalt
Leistungsschlüssel	99080109000000, 99080109000000
Leistungsbezeichnung I	Erection of temporary aviation obstacles
Leistungsbezeichnung II	Authorization to erect temporary aviation obstacles Issuance
Typisierung	2 - Bundesauftragsverwaltung: Regelung
Quellredaktion	Nordrhein-Westfalen
Freigabestatus Katalog	unbestimmter Freigabestatus
Freigabestatus Bibliothek	unbestimmter Freigabestatus
Begriffe im Kontext	
Leistungstyp	Leistungsobjekt
Leistungsgruppierung	Luftverkehr (080)
Verrichtungskennung	
SDG-Informationsbereich	Erlangung von Lizenzen, Genehmigungen oder Zulassungen im Hinblick auf die Gründung und Führung eines Unternehmens
Lagen Portalverbund	Erlaubnisse und Genehmigungen (2010400),

Modul	Sachverhalt
	Bauplanung (2050400)
Einheitlicher Ansprechpartner	Nein
Fachlich freigegeben am	29.07.2022
Fachlich freigegeben durch	Ministry of Transport of the State of North Rhine-Westphalia
Handlungsgrundlage	§§ 12, 17, 18a LuftVG https://www.gesetze-im-internet.de/luftvg/_12.html https://www.gesetze-im-internet.de/luftvg/_17.html https://www.gesetze-im-internet.de/luftvg/_18a.html https://www.gesetze-im-internet.de/luftvg/_12.html https://www.gesetze-im-internet.de/luftvg/_17.html https://www.gesetze-im-internet.de/luftvg/_18a.html
Teaser	Construction equipment and other objects can represent an obstacle to aviation due to their height and location. Such obstacles to aviation require approval under aviation law.
Volltext	Construction equipment and other temporary objects can represent an obstacle to aviation due to their height and location. Such obstacles to aviation require approval under aviation law. If you require a building permit for the construction of a building, you do not have to apply separately for an aviation permit for the building. The building authority will involve the aviation authority as part of the building permit procedure. Approval or authorization under aviation law is required for obstacles in the following cases: • Generally from a height of 100 meters above ground level • on natural or artificial ground elevations from a height of 30 meters above ground level • in the construction protection areas of airfields (with different height levels) Approval or authorization for aviation obstacles may be subject to conditions. Possible conditions may

Modul	Sachverhalt
	include height restrictions on aviation obstacles or day and night markings. Temporary obstacles, such as cranes, must be marked in yellow, red or orange or by flags or warning signs. Aviation obstacles are marked at night by red obstacle lights (steady) and/or hazard lights (flashing).
Erforderliche Unterlagen	• Data sheet for each tower crane, mobile crane, folding crane and/or construction equipment • Overview site plan • Site plan • Coordinates • Construction site plan
Voraussetzungen	None
Kosten	Temporary obstacle: EUR 110 to 150
Verfahrensablauf	You must apply for the aviation permit in writing or online from the competent authority.
Bearbeitungsdauer	12 working days
Frist	Please submit your application in good time.
weiterführende Informationen	The Federal Supervisory Authority for Air Navigation Services (BAF) provides an interactive map on its website that shows the air traffic control facilities and their facility protection areas. https://www.baf.bund.de/DE/Service/Anlagenschutz/InteraktiveKarte/interaktivekarte_node.html To protect against interference, installation protection zones have been set up around air traffic control installations (radio, positioning and navigation installations). Interference with these systems can impair communication between pilots and air traffic controllers, or positions in the aircraft or by the radar may be displayed incorrectly.
Hinweise	Two technical reports are usually required in the approval procedure. Additional costs are incurred for this, which are to be paid directly by the applicant.
Rechtsbehelf	
Kurztext	• Construction equipment, e.g. cranes or concrete

Modul	Sachverhalt
	pumps, may be subject to approval under aviation law. • Approval under aviation law required for: • Height from 100 meters above ground • In the construction protection area of airfields
