Teaser	Are you looking for information on a water right? Then you can use the water register to start your search for water rights by specifying the location, type and purpose of water use.
Volltext	The water book is a register containing legal relationships relating to water management. The primary purpose of the water register is to inform the competent authorities about existing uses and developments in water bodies and areas protected by water management legislation. The Water Book is also a register and tool for the implementation of the European Union's Water Framework Directive. It also provides environmental information for the public. You must apply for access to the water register. Information from the Water Book is provided by the competent authorities in the individual federal states. In particular, the following are entered in the water register • Permits, for example for geothermal energy, wastewater discharges or groundwater extraction • permits • Water protection areas • Construction or expansion of bodies of water • designated flood areas • risk areas • Old rights and powers
Erforderliche Unterlagen	Written or verbal application (informal) with information on the location, type and purpose of the water use.

Modul	Sachverhalt
Voraussetzungen	No legal requirements need to be met for information from the water register.
Kosten	Note: Inspection of the water register is free of charge. Fees for an official extract from the water register depend on the federal state.
Verfahrensablauf	• You can apply for an extract from the water register using the online form. • Enter information in the online form about the water body in question, its location and/or the rights holder. If known, enter the water register number. • The water authority will compile the information you require and send it to you.
Bearbeitungsdauer	2 weeks to 4 weeks
Frist	
weiterführende Informationen	
Hinweise	
Rechtsbehelf	• Appeal if necessary (depending on the federal state) • Subsequent action for an obligation before the administrative court
Kurztext	• Water book provision • The water book is a central documentation of permitted groundwater and surface water uses. • An application must be submitted for information in the water book. • Required documents: - Written application (informal) - Requirements: none - Costs: Inspection free of charge, fees for official extract depend on the federal state. - Processing time: 2 - 4 weeks - Responsible: The competent authority is determined by the regulations of the individual federal states.
