Teaser	You can register the collection of your organic waste from your private household if your public waste disposal provider offers this service.
Volltext	If you collect biodegradable waste (organic kitchen waste and garden waste) separately from the residual waste, this has several advantages for the environment: you reduce the amount of residual waste and make it easier to dispose of the residual waste. Separate collection simplifies the high-quality recycling of biowaste through fermentation. In addition, the humus components and nutrients contained in the biowaste can be returned to the natural cycle as fermentation substrate or compost.
Erforderliche Unterlagen	
Voraussetzungen	<p>Is it organic waste from your private household and does your public waste disposal authority offer to collect your organic waste (e.g. organic waste garbage can)?</p> <p>Then it can be put in the organic waste garbage can (your public waste disposal authority has binding information):</p> <ul style="list-style-type: none"> • Bio-waste collection bags made of paper • Potted plants (without pot), also with potting soil • Bio-waste collection bags made from biodegradable plastic • Bread and bakery waste • Egg shells • feathers • Fish scraps and bones (normal household quantities; if necessary, wrapped in a little kitchen paper/kitchen roll or newspaper, no glossy paper, for example from magazines, periodicals or paper from old wallpaper) • Meat and sausage waste (normal household quantities; if necessary, wrapped in a small amount of
