Teaser	Do you operate a crematorium? Then you must have the air pollutant emissions from the facility tested and submit the measurement results to the responsible immission control authority.
Volltext	As the operator of a cremation facility, you are obliged to have the emissions of total dust, total carbon and dioxins and furans tested by a recognized expert body at regular intervals by means of discontinuous measurements (individual measurements) in order to monitor the emissions of air pollutants. A measurement report must be drawn up on the results of the measurements and submitted to the competent authority for review.
Erforderliche Unterlagen	• Emission measurement report
Voraussetzungen	
Kosten	
Verfahrensablauf	The official requirements for carrying out the emission measurements and submitting the emission measurement report are set out in the regulations on cremation facilities. In future, emission measurement reports will be submitted via the online portal "EMBE-Online".
Bearbeitungsdauer	

Modul	Sachverhalt
Frist	Individual measurements must be carried out by a recognized expert no earlier than three months and no later than six months after commissioning. The measurement report must be submitted within three months of the measurement being carried out.
