Teaser	If you are constructing or have erected a plant requiring a permit and this installation has not yet been approved or notified, you must report this to the competent authority in due time.
Volltext	<p>Coal-fired power plants, industrial plants, intensive livestock farms and similar installations cause air pollution, noise, vibrations, etc. to a particularly high degree.</p> <p>In order to protect people and the environment from harmful environmental effects and to prevent the occurrence of harmful environmental effects, such plants require a permit for construction and operation in accordance with the Federal Immission Control Act (BImSchG). The installations that are subject to a permit requirement due to their nature and size are listed conclusively in the Ordinance on Installations Requiring a Permit (4th BIm-SchV).</p> <p>A plant that does not require a permit and that has already been built or whose construction or significant modification has begun becomes subject to approval by inclusion in the catalog of plants requiring a permit of the Ordinance (4th BImSchV). In this case, the plant is subject to the immission control approval requirements and must be registered with the competent authority within a period of three months</p>
