Teaser	Water supply companies are responsible for ensuring that only safe drinking water is supplied to consumers. What can you as a consumer do if the water is discoloured, smells or tastes unusual or causes discomfort?
Volltext	Water supply companies are responsible for ensuring that only safe drinking water is supplied to consumers. What can you as a consumer do if the water is discoloured, smells or tastes unusual or causes discomfort? The first point of contact is the water supply company - it must investigate the problem. However, you can also contact the public health department if you have a justified complaint.
Erforderliche Unterlagen	
Voraussetzungen	Suspicion of contamination in drinking water
Kosten	• The health authority will decide on any costs of an official drinking water test. • The respective authority will inform you about the costs of a self-initiated test (without an official complaint) by recognised drinking water laboratories.
Verfahrensablauf	• You can report to the responsible authorities in person, in writing or by telephone. • Give a description of the change (colour, smell, taste). In response to your complaint, an employee of the water supply company or the public health department may visit your household and take a drinking water sample. This will be analysed in the laboratory.
