Volltext

Application for a licence or authorisation to fly an aircraft in accordance with the German Air Traffic Act (LuftVG)

In order to be authorised to fly an aircraft, you must have the appropriate permit. After successfully completing training and passing an examination, you can obtain a pilot's licence for the relevant aircraft category.

The acquisition of a licence to fly aircraft requires theoretical and practical training. The training can only be carried out at an approved or declared training organisation (so-called flight school). Knowledge of aviation law, human performance, meteorology, communication, the basics of flying, operating procedures, flight performance and flight planning, general aircraft knowledge as well as navigation and practical skills are taught. The licence is only issued after the theoretical and practical examinations have been passed.

Other competences

The licences for commercial and professional pilots as well as the licences for air sports equipment (ultralight aircraft, hang gliders, paragliders and parachutists) are not the responsibility of the state aviation authorities.
