Volltext	Are you subject to the obligation to provide proof of hazardous waste and must have a waste disposal licence issued? Then, under certain circumstances, you will need an officially recognised waste disposal certificate. Disposal, i.e. the recovery or disposal including the collection and transport of hazardous waste, is subject to a verification procedure under waste legislation. Waste producers and the owners, carriers, collectors and disposers of hazardous waste are obliged to do so. Private households and small-scale producers who do not generate more than two tonnes of hazardous waste per year are exempt. If the disposer is not authorised for the privileged procedure and no collection certificate from a carrier can be used because more than 20 tonnes of waste is generated at the point of generation in the year, an officially confirmed waste disposal certificate is required.
