Volltext	<p>If you wish to erect a facility for the generation of ionising radiation, you will require a licence under radiation protection law in certain cases.</p> <p>You will require a licence under radiation protection law for the construction of a facility of the following types:</p> <ul style="list-style-type: none"> <li>• Accelerator or plasma facility in which more than 1012 neutrons can be generated per second, or</li> <li>• Electron accelerators with a final electron energy of more than 10 megaelectronvolts, provided that the average beam power can exceed 1 kilowatt, or</li> <li>• Electron accelerators with a final electron energy of more than 150 megaelectronvolts, or</li> <li>• Ion accelerators with a final ion energy of more than</li> </ul>

Modul	Sachverhalt
	<p>10 megaelectronvolts per nucleon, provided that the average beam power can exceed 50 watts, or</p> <ul style="list-style-type: none"> <li>• Ion accelerators with a final ion energy of more than 150 megaelectronvolts per nucleon.</li> </ul>
	<p>In the application for authorisation, you must prove that the future planned operation of the facility is justified and safe.</p>
Erforderliche Unterlagen	<ul style="list-style-type: none"> <li>• Application,</li> <li>• Details of the person responsible for radiation protection and their authorised representative,</li> <li>• Certificate of good conduct of document type 0 for the applicant or their authorised representative,</li> <li>• Details of the radiation protection officer including proof of the necessary expertise in radiation protection,</li> <li>• Detailed information on the facility for the generation of ionising radiation,</li> <li>• Planning for handling activated plant components after decommissioning of the plant,</li> <li>• Estimates of occupational exposure and population exposure,</li> <li>• Documentation on rules of behaviour and measures in the event of accidents/incidents</li> <li>• Safety report,</li> </ul>
	<p>For more information on the documents that you must submit with your application, please refer to the list of items to be included with the application (see -&gt; Legal basis).</p>
Voraussetzungen	<p>The authorisation requirements are specified in Section 11 of the Radiation Protection Act. They can be summarised as follows:</p> <ol style="list-style-type: none"> <li>1. There must be no facts that give rise to concerns about the reliability of the person obliged to provide notification</li> <li>2. A radiation protection officer with the necessary expertise must be appointed for the installation.</li> </ol>

Modul	Sachverhalt
	<p>3. It must be ensured that the limit values for the permissible exposure of the population are complied with.</p> <p>4. The regulations on the protection of the environment during operation and in the event of an incident must be complied with.</p> <p>5. The necessary protection against disruptive measures and other effects of third parties must be guaranteed.</p> <p>6. The activity must be justified.</p>
Kosten	<ul style="list-style-type: none"> <li>Fee range: at least EUR 375.00 depending on the construction costs of the facility (including the building, if this is relevant for radiation protection)</li> </ul>
Verfahrensablauf	<ul style="list-style-type: none"> <li>Submit your application for authorisation to the responsible office.           <ul style="list-style-type: none"> <li>The competent body will check the application received and contact the person you specified with any questions or additional requirements.</li> <li>If all authorisation requirements are met, the responsible office will send you the approval notice by post.</li> </ul> </li> </ul>
Bearbeitungsdauer	<ul style="list-style-type: none"> <li>at least 4 weeks The processing time depends on the complexity of your system and the planned operation and on the completeness of the documents you submit.</li> </ul>
Frist	none
