Teaser	If you are working or being employed in the food sector for the first time, you will need a certificate from the public health department confirming that you have been instructed in infection protection.
Volltext	Do you produce food, handle it or place it on the market? Do you come into direct or indirect contact with these foods (via utensils such as plates or cutlery)? Would you like to work or become active in kitchens in restaurants, canteens and cafés or in communal catering facilities? Then you need a certificate from the public health department that is no more than 3 months old. This proves that you have successfully completed an instruction course on infection protection measures. The aim of the instruction is to enable you to recognize your own symptoms of infectious diseases or those of your employees at an early stage. This should enable you to prevent the spread of infectious diseases and contamination of food and to assess when you should no longer carry out your work if you have certain symptoms. The certificate is issued either by the public health department or by a doctor appointed by the public health department.

Modul	Sachverhalt
Erforderliche Unterlagen	
Voraussetzungen	• You are working commercially for the first time or are employed in the manufacture, treatment or placing on the market of foodstuffs during which you come into contact with them. • There are no indications that you have an infectious disease (e.g. salmonellosis, shigellosis).

Hinweise	A specific form of instruction is not prescribed by the IfSG. After the instruction, it must be declared in text form that there are no known facts for a prohibition of activity. If there are indications that there are reasons for an impediment to working in the food sector, the certificate may only be issued if a medical certificate proves that the relevant impediment no longer exists.
Rechtsbehelf	
Kurztext	• for first-time commercial activities or employment
