Teaser	If you would like to implement a project in the area of research & development or an investment project for the transition to a resource-efficient circular economy in companies, you can receive funding for the project under certain conditions.
Volltext	Priority is given to small and medium-sized enterprises (SMEs) with business premises in Schleswig-Holstein. The eligible expenditure must amount to at least 75,000 euros. The funding project applied for must have a positive impact on the climate, which you must be able to demonstrate. These can be as follows: • Resource-efficient product designs, production processes, business models • Separation of pollutants with the aim of recycling previously disposed waste • Better separation processes compared to the industry standard with the aim of increasing recycling rates or higher-value recovery • Waste treatment processes for high-quality recycling • Cooperation with universities, research institutes The funding rate depends on the size of the company and the planned project (project in the area of research & development or investment project, planned cooperation).

Modul	Sachverhalt
Erforderliche Unterlagen	• Alternatively: Business registration in connection with a copy of the identity card of the person authorized to represent the company • Extract from the commercial register • Annex to the cross-sectional objectives (scoring sheet) • Project description • Description of the applicant company • Description of the environmental impacts and economic effects • Cost and financing plan • Proof that project staff are employed by the company (e.g. employment contracts) • Proof of qualifications of all project staff • Data protection declaration
Voraussetzungen	• The project must not have been started yet. • The company must be based/operate in Schleswig-Holstein. • The applicant company must be a small or medium-sized enterprise (SME) (funding for large companies is only possible in exceptional cases). • The first stage of the application procedure (project proposal) must have been completed with a positive result. • The project must make a contribution to the cross-cutting objectives (equality, non-discrimination and sustainable development). • The funding project applied for must have a positive impact on the climate. • The eligible expenditure must amount to at least EUR 75,000.
Kosten	There are no fees.
Verfahrensablauf	• You submit the project proposal directly to Wirtschaftsförderung und Technologietransfer Schleswig-Holstein GmbH. • The project proposal will be assessed by Wirtschaftsförderung und Technologietransfer Schleswig-Holstein GmbH to determine whether the project is fundamentally eligible and worthy of funding. • If the assessment is positive, the application is recommended. • You register with your company account in the online portal.

Modul	Sachverhalt
	• You create the application and submit it. • If an early start has been applied for, a written approval for an early start will be issued. • The project can then begin. • The final review of the application is carried out by the approval office. • If the result of the review is positive, you will receive the grant notification. • Proof and receipts must be submitted for the reimbursement of eligible expenditure. • The grant will be paid out in installments. After approval of the grant • Submission of the proof of use (factual report; proof of project expenditure) • Final notification
Bearbeitungsdauer	4 - 8 Woche(n)
Frist

Hinweise	The documents to be submitted in the application and in the other documents are relevant to the subsidy. A declaration to this effect must be submitted as part of the application. The granting authority must be informed immediately of any changes to facts relevant to the subsidy. In the event of deliberate or reckless misrepresentation, prosecution for subsidy fraud must be expected.
Rechtsbehelf	Contradiction
Kurztext	• Promotion of a resource-efficient circular economy for companies Approval • Resource-efficient product designs, production processes, business models • Separation of pollutants with the aim of recycling previously disposed waste • Better separation processes compared to the industry standard with the aim of increasing recycling rates or higher-value recovery • Waste treatment processes for high-quality recycling • Cooperation with universities, research institutes • Responsible body: Wirtschaftsförderung und
