Teaser	Air cleanliness plans exist in areas with poor air quality. Environmental zones are possible measures under these plans. Environmental zones reduce dust and nitrogen dioxide emissions. Vehicles with high levels of harmful emissions are not permitted to be driven in environmental zones.
Volltext	Air cleanliness plans exist in areas with poor air quality. Environmental zones are possible measures under these plans. Environmental zones reduce dust and nitrogen dioxide emissions. Vehicles with high levels of harmful emissions are not permitted to be driven in environmental zones. Should you wish to drive your vehicle in such a zone, you must purchase an environment sticker. There are three different colours of stickers, which are each assigned to an emissions group. The assignment of your vehicle to one of these categories depends on the emission key numbers. You will find these in the vehicle papers.
Erforderliche Unterlagen	Vehicle certificate (in case of older vehicles) or registration certificate part I (in case of newer vehicles)
Voraussetzungen	In order to obtain an environmental sticker, your vehicle must fulfil the criteria of emission groups 2, 3 or 4. For vehicles of emission group 1, it is not possible to obtain a sticker. These include: • Petrol vehicles without a catalytic converter and • old diesel vehicles with Euro 1 exhaust norm or worse.
Kosten	Depends on the city or district, AU workshop or inspection organisation: usually 5 to 8 EUR
Verfahrensablauf	
Bearbeitungsdauer	In most cases, you receive the sticker immediately.
Frist
