The term "outdoor area" refers to land and areas that are located outside of contiguous buildings and not within the scope of qualified development plans.</p>

Modul

Sachverhalt

If this is a project for which no building permit is required (procedure-free projects in accordance with Section 50 of the State Building Code), a nature conservation permit may still be required. Whether authorisation is required depends on the location, type and size of the project. The nature conservation licence can be applied for here.

Erforderliche Unterlagen

The required documents and information are requested in the service portal. Which documents and information are required varies from case to case.

You should submit a simple application with a map section showing the location and a simple sketch plan. The lower nature conservation authority at the district office or municipal administration will check whether a nature conservation licence is required for the project and whether further documents may be required.

Voraussetzungen

Authorisation under nature conservation law may be required for the following projects in outdoor areas, for example:

- Mobile silo
- Fence, enclosure
- Buildings (without recreation rooms, toilets or fireplaces) with no more than 20 m³ of enclosed space
 - Agricultural and forestry buildings with a floor area of less than 100m²
- Antenna
- Temporary construction
- Unpaved agricultural or forestry storage or parking areas up to 500m² floor space
 - Wind turbines up to 10 metres high
 - Sealed/paved surfaces

Kosten

The costs depend on the application (What are you applying for? What is the cost to the authority?) and can vary from authority to authority.

Verfahrensablauf

If you are planning to erect building structures, you should contact the relevant authority in advance and apply for a permit if necessary. The information required for this will be automatically forwarded to the relevant authorities once it has been entered in the

Modul	Sachverhalt
	service portal.
Bearbeitungsdauer	depending on the application
Frist	It is advisable to contact the responsible authority as early as possible. It is conceivable that further questions or additional requirements may arise regarding your application, which may take additional time. You should contact your competent authority at least one month before the start of the project.
