Teaser	
Volltext	In order to protect drinking water extraction plants and their catchment areas from adverse effects, water protection areas may be established. Within these areas, certain acts which may endanger groundwater are prohibited or certain precautions must be observed. Water conservation areas are regularly subdivided into zones I, II and III with varying levels of protection requirements. Within the areas closer to the drinking water extraction plant, stricter bans apply than in the more distant ones. In the water conservation area, the safeguarding of drinking water takes precedence over all other uses, up to and down to the total prohibition, if this is necessary to achieve
