Teaser	Adapted to the personal situation of those seeking advice and help, a needs-based solution for care and relief care - if necessary together with the relatives or caregivers - is to be found and mediated by means of advice and possible assistance.
Volltext	People in need of care or at risk of needing care, as well as their relatives, are given free, neutral and professional advice at the local care support centers on all issues relating to home care, part-time inpatient care (e.g. day or night care), short-term care (short-term home care, e.g. after a hospital stay) or inpatient care (permanent home care). On request, help is provided with the application for care benefits, or appropriate assistance is arranged or contacts are established. Competent care advisors and social advisors are available in the care support centers for this purpose. The care support centers are operated jointly by the care insurance funds and the respective administrative district or the respective independent city. As a rule, they are located in the vicinity of the district or municipal administrations of the respective counties and independent cities. The state supports the care support centers together with the state associations of long-term care insurance funds and the municipal state associations within the framework of a steering committee.
