Teaser	Persons in need of long-term care who are basically cared for at home can be cared for at night in a facility.
Volltext	<p>Night care is intended to provide accompanying support for care at home. You can claim benefits from daytime inpatient night care if home care cannot be provided to a sufficient extent or if this is necessary to supplement or strengthen home care. Partial inpatient care also includes the necessary transportation of the person in need of care from the home to the night care facility and back.</p> <p>Within the limits of the maximum benefit amounts, the long-term care insurance fund covers the care-related expenses, including the expenses for care, and the expenses for the medical treatment care services required in the facility. In contrast, the costs of room and board, training, and investment costs that can be charged separately must generally be borne privately.</p> <p>Night care facilities care for people in need of care who require assistance with going to bed, getting up and with personal hygiene measures.</p> <p>Night care facilities are often used by people with dementia who have a disturbed day-night rhythm. When they are placed in a night care facility at night, family members can sleep through the night and return to caring for the person in need of care during the day.</p> <p>People in need of care in care grades 2 to 5 can use day and night care in addition to outpatient care benefits in kind, care allowance or the combination</p>
