- suitability of the products to cause harmful effects on the environment through air pollution, noise or vibrations when used as intended,

is required.

Annex I of the Ordinance on Immission Control and Major Accidents Officers specifies the installations subject to licensing for which the operator must appoint an immission control officer.

The operator must immediately notify the competent authority of the appointment of the immission control officer and the designation of his duties as well as changes in his area of responsibility and his dismissal.

Operators of certain installations that are subject to the requirements of the Federal Immission Control Act (BImSchG) must appoint immission control officers. The plant operator must immediately notify the competent authority of the appointment of the immission control officer, stating his duties and changes in his area of responsibility, and of his dismissal. The appointment of one or more immission control officers (immission control officers) is required if, in view of the type or size of the installations, harmful environmental impacts are caused by air pollution, noise or vibrations due to the emissions emanating from the installations, technical problems in limiting emissions or the suitability of the products when used as intended. Annex I of the Ordinance on Emission Control and Major Accidents Officers (Verordnung über Immissionsschutz-und Störfallbeauftragte) specifies which installations are subject to licensing and for which the operator must appoint an immission control officer. The competent authority can also order that operators of installations not subject to licensing must also appoint one or more immission control officers if the need arises in individual cases.
