Teaser	If you operate an aquaculture operation and intend to introduce non-native fish species or translocate alien species, you must apply to the competent authority for a permit.
Volltext	If you operate an aquaculture business and intend to introduce non-native fish species or translocate alien species, you must apply for a permit from the competent authority of the EU member state. In Germany, the upper fisheries authorities of the respective federal states are responsible. The competent authority will review your application and decide whether it is a routine or non-routine procedure. Depending on the decision, further circumstances/environmental factors are examined. Permits can only be issued if the risk assessment, including any risk mitigation measures, shows a low environmental risk.
