| Teaser                        | Under certain conditions, you can use the privileged procedure for your collective waste disposal certificate.  |
| Volltext                      | <p>As a waste-generating company that produces hazardous waste, you and the companies involved in its disposal must provide evidence of proper disposal, both to each other and to the competent authorities, and keep the necessary verification documents.</p> <p>As a waste-generating or waste-disposing company, you must provide proof of disposal even before the start of disposal in order to prove the permissibility of the planned type of disposal.</p> <p>However, if you generate less than 20 tons of hazardous waste per year, you can participate in the collective waste disposal certificate procedure instead. In this case, it is not the waste-generating company that provides proof of disposal, but the company that collects the waste.</p> <p>The competent authority must generally also confirm the permissibility of disposal before disposal begins in the collective waste disposal certificate procedure.</p> |

## Modul

## Sachverhalt

The obligation to confirm the collective waste disposal certificate does not apply in the so-called privileged procedure. This applies to the following companies:

- Disposal facilities that are certified as specialized waste management companies or
- Disposal facilities that belong to a company entered in the EMAS register or
- Waste management facilities that are exempt from the confirmation requirement upon application by the competent authority.

In the privileged procedure, you can start disposal immediately after sending the collective waste disposal certificate to the competent authority.

## Erforderliche Unterlagen

In electronic form:

- Cover sheet (DEN)
- Responsible declaration (VE) of the waste collecting company
  - If applicable, including declaration analysis (DA)
  - Acceptance declaration (AE) of the waste disposal company

## Voraussetzungen

- Software with which the verification documents can be created, processed and signed in electronic form and exchanged with other companies and the authorities. A personal signature card and a card reader are also required for the qualified signature of the forms.
  - The waste management company numbers of the waste collecting and waste disposal companies must be entered in the verification forms. If these have not yet been issued, they must be applied for from the competent authority before the verification forms are created.
  - The waste disposal company must fulfill one of the required conditions:
    - Specialist waste management company
    - EMAS certification
    - Exemption by the authority

## Modul

## Sachverhalt

- In the case of the collective waste disposal certificate procedure, it is not the waste-generating company that keeps a waste disposal certificate, but the company that collects the waste.
- As a rule, this also includes the confirmation of a collective waste disposal certificate by the authority responsible for the disposal facility.
- This confirmation is not required in the so-called privileged procedure. This applies to:
  - Disposal facilities that are certified as specialized waste management companies,
  - waste management facilities that belong to a company entered in the EMAS register and or
  - waste management facilities that have been exempted from the confirmation obligation by the competent authority upon request.
- In collective disposal for the types of waste listed in Annex 2 of the Ordinance on Waste Recovery and Disposal Records (NachwV)
- In cases of exemption or privileged status, the waste disposal company only has to notify the authority of the proof of disposal. No confirmation is required here.
- Responsible in Thuringia: Thuringian State Office for the Environment, Mining and Nature Conservation (TLUBN)
