Teaser	For medical emergencies, various care services are available from emergency services outside of opening hours.
Volltext	Unexpected often comes ... and not infrequently help is needed. The associations of SHI-accredited dentists and the Federal Association of SHI-accredited dentists must ensure the provision of contractual (dental) care. This also includes the provision of contractual (dental) care during off-hours (emergency service). In principle, every contracted (dental) practitioner is obliged to participate in the emergency service. The organized general emergency service covers the emergency service areas. Look for the menu item "Emergency Service" on the website of the Association of Panel Doctors of Thuringia, which is responsible for the emergency service of panel doctors. The same applies to the emergency service of panel dentists. The information can be found on the website of the Association of Statutory Health Insurance Dentists in Thuringia. Nationwide, the number 116117 is valid for the emergency service of panel doctors. For the emergency service of panel dentists, the number 01805-908077 is available. Or search on the websites of your municipality, city or district (often under the generic term "health" and/or "social affairs"). There you will usually find up-to-date information on pharmacy emergency services and the emergency services of doctors and hospitals. The list of pharmacies on emergency duty is also published in the local press.
