Teaser	Topographic maps - reference in analog or digital form
Volltext	Do you need maps for leisure, planning or research projects? The Thuringian State Office for Soil Management and Geoinformation (TLBG) publishes the official topographical maps for the territory of the Free State of Thuringia. The state map series for Thuringia are published at scales ranging from 1:10,000 (large scale) to 1:100,000 (small scale). The larger the scale, the more detailed the depiction of the features on the map and the more map sheets are produced. The selection of available map sheets (KB) amounts to 535 KB at a scale of 1:10,000, 128 KB at a scale of 1:25,000, 31 KB at a scale of 1:50,000 and 9 KB at a scale of 1:100,000. In addition, further topographical overview maps are published at a smaller scale of 1:250,000, covering the territory of the Free State. The topographic maps at various scales form the basis of a large number of thematic general maps that are produced and made available by the TLBG. • **Topographic maps and the thematic maps derived from them are available in analog (multi-color print - folded or plano edition) or digital format. Anyone can obtain them digitally free of charge in just a few steps from the _Geoportal-Th_ (see link below).** • **Products subject to a charge (analog / individual digital) can be obtained via the TLBG online store (see _Electronic application_), directly from the responsible
