Teaser	
Volltext	With the promotion of flood protection systems and flood plains, flood protection is guaranteed inland. This support measure serves in particular to protect agricultural areas, but the municipalities with their populated areas also benefit from it. The aim is to protect agricultural production potential by improving the water management infrastructure and flood protection. In addition, the consequences of natural disasters or adverse weather conditions are to be reduced.
Erforderliche Unterlagen	Application documents are required. Please contact the competent authority.
Voraussetzungen	It should be noted, among other things, that the construction and expansion of flood protection facilities as well as the dismantling of dikes are only funded within the framework of a flood protection concept or with corresponding conceptual preparatory work. Area-relevant measures must be discussed in advance with affected property owners. The following projects are funded: • new construction and extension of flood protection facilities (especially dikes), • dismantling of dikes for the reclamation of floodplains, • Repair of existing pumping stations,

Modul	Sachverhalt
	• Concepts, studies and surveys as well as accompanying preparatory and follow-up work in connection with the aforementioned measures (including pure flood protection concepts), • Planning (e.g. feasibility studies, variant investigations, flood protection plans, approval and implementation planning) • Consultations with regard to the consideration of flood protection on a river basin basis Eligible applicants are: • Authorities • Corporations under public law • Legal entities with maintenance obligations on bodies of water
Kosten	Fees may apply, please contact the competent authority.
