Teaser	Persons in need of care who are basically cared for at home can be cared for at night in a facility.
Volltext	<p>Night care is intended to provide accompanying support for care at home. You can claim benefits of night care if home care cannot be ensured to a sufficient extent or if this is necessary to supplement or strengthen home care.</p> <p>Within the framework of the maximum benefit amounts, the long-term care insurance fund assumes the care-related expenses, including the expenses for care, and the expenses for the medical treatment care services required in the facility. The costs for accommodation and meals as well as separately billable investment costs, on the other hand, must always be borne privately.</p> <p>Night care facilities look after people in need of care who require assistance in going to bed, getting up and with personal hygiene measures.</p> <p>Night care facilities are often used by people with dementia who have a disturbed day-night rhythm. If they are accommodated in a night care facility at night, their relatives can sleep through the night and return to caring for the person in need of care during the day.</p> <p>People in need of care in care grades 2 to 5 can make use of day and night care in addition to outpatient care benefits in kind, care allowance or the combination benefit in accordance with § 38, without these entitlements being offset.</p>
