## Modul

## Sachverhalt

these weapons as to functional weapons subject to authorisation.

The rendering unusable is usually carried out by a gunsmith/weapon manufacturer. The competent ballistic office issues a deactivation certificate as proof that the weapon has been rendered unusable in accordance with the requirements of the EU Deactivation Implementation Regulation. You must keep the deactivation certificate together with the weapons that have been rendered unusable or take it with you when transporting such weapons. If you lose the deactivation certificate, you must report this immediately to the competent weapons authority.

A weapon has been destroyed when its technical functionality is permanently suspended and its physical existence no longer exists (e.g. by shredding or melting down the weapon).

If you have reported the rendering unusable or destroyed and submitted the necessary evidence, the competent weapons authority will remove this weapon from your permit documents (e.g. firearms possession card, firearms license, European firearms pass).

## Erforderliche Unterlagen

- Identity card or passport (copy)
- Certificates of authorisation (e.g. firearms possession card, European firearms pass) in which the weapons are registered (if available)
- Certificate of deactivation (officially certified copy) or proof of destruction of the weapon (e.g. presentation of the destroyed weapon or detailed visual documentation of the destruction process)
- Power of attorney/proof of activity/other proof if the notifier is not the permit holder, e.g. insolvency/compulsory administrator, officially appointed guardian, possessor (in the event of the death of the permit holder)

## Voraussetzungen

You must have a certificate of deactivation or proof of destruction of the weapon.
