Volltext	<p>For certain motor vehicles placed on the market for the first time on or after 01.05.2006, the use of digital recording equipment is mandatory. This applies to vehicles used for the carriage of goods with a maximum permissible weight, including trailers or semi-trailers, exceeding 3.5 tonnes, as well as vehicles used for the carriage of persons which, by virtue of their construction and equipment, are suitable and intended to carry more than nine persons, including the driver. The digital recording device records driving times and rest periods, makes manipulation more difficult to the detriment of general road safety and facilitates checks. The driver card replaces the previous speedometer disc and stores the driving and rest periods for at least 28 days. After that, the oldest data is overwritten. Each driver may only have one valid driver card. This is checked (national: Central Tachograph Card Register, international: TACHOnet). The following data can be read:</p> <ul style="list-style-type: none"> • Surname, first name, date of birth, photograph and signature of the applicant • Driver's license number • Nationality of the issuing country • Validity period (from / to) • Driving and rest periods (including interruption and whether the driver has driven alone or in two-driver mode) • Data relating to the vehicle (operating times, date, registration number, mileage) • Events, errors and controls
