Volltext	Due to a serious illness or accident, you, a family member or a loved one may suddenly find yourself dependent on a life-saving organ or tissue transplant. In Lower Saxony alone, more than 2,000 people are waiting for a donor organ. Almost anyone can donate organs and tissue. There is no age limit. Only people who are infected with HIV, suffering from AIDS or have malignant tumors are usually not suitable as donors. It is not necessary to undergo a medical examination today if you want to donate organs or tissues after your death. Organ and tissue donation is voluntary and a personal decision. Donation, removal and transfer of organs and tissues are clearly regulated by law. If you decide to do so, you should document this in writing in the organ donor card if possible. So you make it easy for your relatives, because otherwise they would have to be asked about the presumed will of a deceased person and decide in his favor.
