Modul	Sachverhalt
Fachlich freigegeben durch	Bayerisches Staatsministerium für Umwelt und Verbraucherschutz (Bavarian State Ministry of the Environment and Consumer Protection)
Handlungsgrundlage	https://www.gesetze-im-internet.de/strlschv_2018/_85.html https://www.gesetze-im-internet.de/strlschv_2018/_85.html https://www.gesetze-im-internet.de/strlschv_2018/_86.html https://www.gesetze-im-internet.de/strlschv_2018/_86.html https://www.gesetze-im-internet.de/strlschv_2018/_103.html https://www.gesetze-im-internet.de/strlschv_2018/_103.html
Teaser	Companies, firms or facilities that handle other radioactive substances must keep records of their stocks and report them to the competent authority.
Volltext	The holder of a license to handle other radioactive substances in accordance with the Radiation Protection Act is obliged to keep records of the extraction, production, acquisition, disposal and whereabouts of radioactive substances and to notify the Bavarian State Office for the Environment (LfU) of the inventory of radioactive substances. The type and activity of the substances, broken down by radionuclides, must also be stated. Other radioactive substances are primarily radioactive substances that are not nuclear fuels. A license in accordance with the Atomic Energy Act is required for handling the latter. Exceptions are small quantities of nuclear fuels, which are considered other radioactive substances under certain conditions.
Erforderliche Unterlagen	The following documents must be submitted: Radiator certificate Application and accompanying certificate as well as accompanying sheet from the Bavarian State Collection Agency
Voraussetzungen	You are the holder of a license to handle other radioactive substances in accordance with the

Modul	Sachverhalt
	Radiation Protection Act.
Kosten	none
Verfahrensablauf	The notification of the inventory of radioactive substances must be submitted to the LfU. The notification can be submitted informally by post and/or e-mail or electronically via the notification wizard for the inventory of radioactive substances (see "Online procedure"). The LfU checks the completeness of the documents and, if necessary, requests the submission of missing documents within a reasonable period of time. The notification should follow the following structure: • Inventory at the beginning of the reporting period, • Acquisition and submission for the reporting period, and • Stock at the end of the reporting period. The information is to be provided broken down by radionuclide, whereby the acquisition and disposal of open radioactive substances can be summarized on a monthly basis. The inventory at the beginning of the reporting period must be submitted including radioactive waste. The disposal includes information on the further fate (transfer to third parties for further use, use on humans, disposal as radioactive waste, disposal after release, disposal as inactive waste in accordance with disposal instructions, disposal by air and/or water). Irrespective of the release of radioactive substances, information on exhaust air or waste water quantities is required in any case if technical facilities in which radioactive substances are handled are in use. As a rule, the amount of waste water can be equated with the amount of fresh water purchased in a year. Activity data must be clearly visible in the reports;

Modul	Sachverhalt
	information on package sizes etc. alone is not sufficient. The report must be confirmed by the signature of the radiation protection officer.
Bearbeitungsdauer	
Frist	The notification of the inventory of other radioactive substances must be submitted to the LfU within one month at the end of the calendar year by January 31 of the following year.
