Teaser	The Bavarian State Office for the Preservation of Monuments can grant subsidies for the preservation of architectural and ground monuments within the meaning of the BayDSchG as well as to ensure the necessary monument-related measures in connection with the recovery and discovery of ground monuments.
Volltext	<p>Notwithstanding existing obligations, the Free State of Bavaria contributes to the costs of monument protection and preservation in the amount of the respective funds allocated in the state budget. The aim is to support the preservation of architectural and archaeological monuments within the meaning of the BayDSchG and to ensure the necessary monument protection measures in connection with the recovery and discovery of archaeological monuments. However, there is no legal entitlement to funding; rather, the decision is made on the basis of dutiful discretion.</p> <p>The amount of support depends on the additional costs incurred for the preservation of the monument (costs incurred that exceed the usual costs). Funding is provided by way of fixed-amount financing.</p>
Erforderliche Unterlagen	<ul style="list-style-type: none"> <li>• MonumentsAn architect's cost estimate or detailed cost estimates from tradesmen or companies showing the type and scope of the planned measure in detail. A photo of the property for whose repair the grant is being applied for.</li> <li>• Ground monumentsConfirmation of the complete submission of the excavation documentation and the finds to the competent authority in accordance with the permit notice. Final invoice from the specialist archaeological company, which must list the following items in detail: personnel costs for fieldwork, costs for the preparation of excavation documentation, other</li> </ul>

## Modul

## Sachverhalt

ancillary costs, any costs for the conservation of finds and accompanying scientific investigations, which have been agreed with the BLfD.

## Voraussetzungen

The requirements differ depending on whether the grant is for architectural monuments or ground monuments.

In each case, an application is required, which should primarily be submitted electronically via the BayernPortal.

Architectural monuments:

The application for a grant for measures on a listed building must be submitted as early as possible to the Lower Monument Protection Authority responsible for the respective listed building.

It must generally be submitted before the start of the measure to be funded, unless the BLfD has expressly declared its consent in writing to the early start of construction. The measure to be funded must have been agreed with the LfD prior to its implementation.

As a general rule, the easiest way to reach agreement is to attend the regular BLfD consultation days at the Lower Monument Protection Authority responsible for the respective monument, where a decision can also be made on a monument permit/building permit.

Ground monuments:

Applications must be submitted directly to the BLfD.

The application for a grant for measures in connection with the excavation and discovery of ground

**Modul**
**Sachverhalt**

monuments must only be submitted directly to the BLfD once the excavation has been fully completed, including submission of the excavation documentation.

The archaeological measure must have begun on 01.05.2025 at the earliest.

The measure must have been carried out in accordance with the permit under monument law and in coordination with the BLfD - Department for the Preservation of Monuments.

The ANBest-P (in the private sector) or ANBest-K (in the municipal sector) in the version valid at the time of the start of the measure must be observed. Due to the downstream funding procedure, this essentially concerns the respective No. 3 of the ANBest for the awarding of contracts.

Eligible costs are the monument-related costs of the archaeological excavation without equipment costs and without municipal management work.

**Kosten**

none

**Verfahrensablauf**
**Bearbeitungsdauer**
**Frist**

The measure for which a grant is applied for may only be commenced after the grant has been approved, unless the Bavarian State Office for the Preservation of Monuments has expressly declared its consent to the early start of construction in writing (e.g. by e-mail). Approval for an earlier start to the project for measures in connection with the recovery and discovery of ground monuments is generally deemed to have been granted.
