Handlungsgrundlage	§ 18 Federal Soil Protection Act (BBodSchG) Hamburg ordinance on experts and inspection bodies according to Section 18 of the Federal Soil Protection Act (HmbVSU) of October 28, 2003.
Teaser	Would you like to provide high-quality services as an expert or inspection body in the EU for tasks under the Federal Soil Protection Act? Then you can apply for official recognition. This serves as proof of qualification for clients
Volltext	The soil protection law of the Federal Republic of Germany stipulates that the qualification of experts and inspection bodies can be recognized by a competent authority. Particularly qualified persons (experts) or examination bodies (testing laboratories and samplers) can apply for their respective recognition in a federal state. This recognition is then valid nationwide. The procedure to be followed depends on the law of the federal state in which the recognition is applied for. If this country does not have its own recognition procedure under state law, it is based on the law of the country in which the procedure is carried out. After completion of the procedure, you will receive a decision in writing. Recognized experts and inspection bodies are also announced on the online research platform ReSyMeSa www.resymesa.de so that those interested in services can contact these service providers. http://www.resymesa.de
