Sachverhalt

requested permit with a field plan and information as to whether it concerns exclusively private property or whether public property is also affected

- Written explanation of the network operation concept, including an explanation of how a safe, inexpensive, consumer-friendly, efficient and environmentally friendly power supply for customers is ensured
- Technical overview plan (network map with legend) in which the supply and consumption situation (including the customer structure, number of households supplied and the amount of energy expected to be transmitted) is shown
- List and technical data of all systems belonging to the network, unless shown in the technical overview plan
- Submission of all relevant operator, management, lease or other contracts relating to the ownership or operation of the network

To prove personnel performance:

- Name of the responsible and responsible persons for network operation and proof of their technical and commercial expertise (description of qualifications, CV, copy of ID card)
- Organizational chart/position plan of the network operation

To prove technical performance:

- Explanation of how compliance with the requirements for technically secure network operation is ensured
- Self-declaration to Section 49 EnWG, see appendix
- Proof of compliance with the requirements
- DIN VDE 1000-10 requirements for people working in the field of electrical engineering
- VDE-AR-N 4001 Application rule: 2011-04 Requirements for the qualification and organization of companies for the operation of electricity supply networks (S 1000)
- Explanation of the measures for troubleshooting
