Kurztext	Six examinations for children up to the age of 6, three of them in infancy: The first examination takes place between 6 and 9 months of age, the second examination between 10 and 20 months and the third examination between 21 and 33 months There are three further dental check-ups up to the age of six: The intervals of these early detection check-ups are coordinated with the medical early detection check-ups U5 to U7 in accordance with the G-BA's children's guideline. Children and adolescents from 6 to 18 years are examined once every six months. From the age of 12, the examinations are entered in a bonus booklet (as proof of the entitlement to increased subsidies for dentures). From the age of 18, the examination takes place once a year (possibly different benefits from health insurance companies).
