Teaser

The state care allowance for blind and severely disabled people is granted to compensate for disability-related disadvantages. It is a lump-sum cash benefit.

Volltext

People who are blind or severely visually impaired or have a severe disability and who usually live in Bremerhaven are entitled to financial support to compensate for disability-related disadvantages or additional needs. The state care allowance is paid as a monthly allowance and is independent of income and assets:

- The state care allowance currently amounts to 494.97 euros per month.
- Children under the age of 18 are entitled to a state care allowance of currently 247.49 euros per month from the age of one.
- Blind and severely disabled people who live in an institution and for whom the costs of their stay are fully or partially covered by public funds receive 50 percent of the state care allowance. Self-payers who live in an institution are not entitled to state care allowance. In this case, the benefits provided by the care insurance fund are taken into account in full.
- Care insurance benefits are offset in full against the state care allowance. This can reduce or completely eliminate the entitlement to state care allowance.
- The income- and asset-dependent care and blindness assistance benefits according to SGB XII can also be claimed if necessary. The state care allowance is offset in full or in part.
